COVER ALL BASES

Traditional security systems are limited by the size and layout of a warehouse or distribution center. Even with multiple motion sensors to protect each door, aisle or row of goods, vulnerabilities still exist in the ceilings and walls—increasingly popular entry points for would-be thieves.

Using our unique impact activated audio detection and verification technology, an Audio Sensor can cover up to 5,000 square feet of open space. Strategically placed audio sensors provide floor-to-ceiling and wall-to-wall coverage—ideal for distribution centers of any size.

CUSTOMIZED SECURITY SOLUTIONS

- Intrusion Alarms - AUDIO & VIDEO VERIFIED
- Access Control
- Video Surveillance
- Fire Detection
